30. Save as. Save the results of the analysis into a file with a name of your choosing. This can be done by selecting a name in the list and clicking the Save button. 31. Append. Append a variable or data block to an existing file. Append is generally used for the addition of new variables or data blocks to the simulation file. This can be useful if you make modifications to a variable and want to see the results of those modifications immediately. To add a variable, select the New in File option, and select one of the built-in variables. When adding a variable, you can select how it is displayed: Number, Text, or Value. The Value option gives you the flexibility to choose an initial value, or to make it variable, by checking the Make Variable box. To add a data block, select the New in File option, and select the type of block from the list. 32. Reimport. Reimport variables, results, data blocks, or block indexes that you have previously saved. 33. Run Report. A run report is a summary of the analysis. It can be displayed by clicking on the Run Report button on the toolbar. 34. Run. The Run command runs the simulation and saves the results to a file. 35. Clear All. Clear all SLIDE elements including Variables, Indices, Data Blocks, Block Indexes, or Result tables. 36. Delete Row. Delete an entry in the model table. 37. Delete Cells. Delete an entry in the simulation table. 38. Save Model As. Save the current SLIDE model into a new file, with a new name. 39. Save Analysis As. Save the current analysis into a new file, with a new name. SLIDE Document Versions When saving a new version of a document, the model, simulation, and analysis tables are saved separately, so that you can save new versions without losing the old version. The changes that you make to the SLIDE model, simulation, or analysis are not saved automatically, so it is possible to lose any changes that you make if you do not save them. You can access the versions of your documents using the Versions menu. SLIDE Customization Options SLIDE offers a variety of options for customizing the appearance of the interface, for configuring your work process, and for controlling the components 82157476af
